OBJECTIVE

Highly results-oriented Information Security Specialist with 2+ years of hands-on experience in enterprise-grade security operations, focused on Data Loss Prevention (DLP), Web Application Firewalls (WAF), and Email Security. Proven success in developing and fine-tuning security policies that yielded a 60% reduction in incident reoccurrence and a 30% reduction in false positives. Seeking to leverage expertise in threat mitigation and security tooling to secure cloud and enterprise environments.

EXPERIENCE

Information Security Engineer

June 2023 - Present

Nusummit CyberSecurity, Full-Time

Mumbai, India

- Engineered and managed enterprise DLP policies across TrendMicro, Forcepoint, and Seqrite platforms, covering PII and financial data for a major Indian client.
- Reduced DLP alerts by 30% through targeted user training and policy refinement, significantly improving the efficiency of the Security Operations Center (SOC).
- Resolved high-priority data loss incidents by performing Root Cause Analysis (RCA) and implementing rule modifications, reducing incident reoccurrence by 60%.
- Deployed and operated a Symantec Proxy Secure Web Gateway (SWG) for a UK client, configuring high-availability setups, SSL inspection, and custom policy layers for 10,000+ users.
- Monitored and mitigated volumetric and application layer attacks (L7 DDoS, SQLi, XSS) using Akamai WAF and Security Center, integrating real-time threat intelligence with SIEM platforms.
- Configured and administered Microsoft Defender for Office 365 and MessageLabs to enforce anti-phishing, anti-malware, and spam filtering, hardening the email security posture.
- Led the full agent deployment life cycle and server configuration for DLP platforms, ensuring alignment with enterprise security and compliance standards.

Cybersecurity Intern – Digital Forensics & VAPT

December 2022 - June 2023

Maharashtra Cyber, Internship

Mumbai, India

- Conducted forensic imaging on 5+ devices daily (HDDs, SSDs, mobile phones) for high-stakes criminal investigations, utilising specialised tools like EnCase, FTK Imager, and Magnet Axion.
- Analysed CDR, IPDR, TDR and firewall logs to reconstruct incident timelines and draft legal notices under the Indian IT Act (Sec. 91 & 79) for law enforcement submission.
- Performed a fundamental vulnerability assessment and penetration testing (VAPT) using Nessus and the Burp Suite to identify vulnerabilities in the network and web applications.

EDUCATION

Bachelor of Computer Science, Universal College Of Engineering

August 2016 - June 2020

Mumbai, India

SKILLS

Security Tools & Platforms: Akamai WAF — Forcepoint DLP — TrendMicro DLP — Symantec Proxy SWG — Microsoft Defender O365 — Splunk — EnCase — Nessus — Burp Suite.

CERTIFICATION

API & APP Protector Basic Services & Support — Symantec Web Protection - Basic Cloud SWG Administration R2 — Web Application Security Testing with Burp Suite.
